

## **Passcovery Suite 2.1: Multi-format Password Recovery on the Latest NVIDIA Titan & Tesla Graphics Cards**

*Saint-Petersburg, Russia – April 26, 2013. Passcovery Co. Ltd. announces the release of updated versions of Passcovery Suite 2.1, its professional password recovery solution with the power of GPU computing. The updated software now features a Chinese language interface option, an intuitive Password Mutation Rules Editor, and support for graphics cards built on NVIDIA Kepler GK110 architecture (GeForce GTX Titan and Tesla K20/K20X).*

---

Passcovery Co. Ltd., the supplier of high-speed password recovery solutions running on AMD and NVIDIA graphics cards, announces updates to Passcovery Suite 2.1, its universal tool with support for a wide range of formats.

All of the updates are focused on making the powerful Passcovery Suite even more versatile and easier to use.

The latest version of Passcovery Suite features a new interface option in Chinese, in addition to the already available English, German, French, Polish and Russian interfaces.

The software also features a new Password Mutation Rules Editor to make it even easier to work with the built-in macrolanguage, which manages how passwords mutate during a dictionary attack. The Password Mutation Rules Editor applies rules as the user creates them, displaying how the rule will work in a clear, understandable format. Passcovery Suite features over 20 password mutation macros. Passcovery Suite's powerful customized mutation tools take dictionary attacks to a whole new level.

Developers also expanded the range of supported graphics cards to improve speed and versatility. Now the software supports the latest NVIDIA architecture – Kepler GK110. Passcovery Suite runs stably and guarantees top password recovery speeds on GeForce GTX Titan & Tesla K20/K20X graphics cards.

Passcovery invites you to test the power of GPU computing for password recovery and decryption of Microsoft Office 97-2003 files using the original rainbow tables featured in Passcovery Suite. Visit the Passcovery Suite site and download a free demo version that runs on all modern Windows operating systems, including Windows 8.

The cost of a license depends on the number of graphics cards supported. For more information, visit the Passcovery Suite site.

### **About the Passcovery Suite**

Passcovery Suite is a professional password recovery tool that runs at lightning-fast speeds on AMD/NVIDIA graphics cards. The software supports a wide range of formats: Microsoft Office/OpenOffice documents, Zip/Rar archives, Apple iOS/Blackberry reserve copies, TrueCrypt volumes and WPA/WPA2 handshakes. Passcovery Suite also

leverages rainbow table technology to decrypt Microsoft Office documents with 40-bit encryption (Microsoft Office 97-2003).

### **About Company**

Passcovery Co. Ltd. supplies high-speed, professional software solutions for recovering lost passwords. The first versions of these solutions were released in 1999. Today, the company's software is successfully used by law enforcement, government agencies, corporations and private individuals around the world.
